

Shipping by Air from EU27 to Northern Ireland

All you need to know about The Windsor Framework

Did you know?

From May 1st 2025, new rules for shipping data and commercial invoice requirements will be implemented for air shipments from EU27 to Northern Ireland.

What do shippers need to do?

1 Provide item-level clear goods descriptions, values and commodity codes

Please specify each item in the shipment with its value, commodity code, weight, and a concise description, eg. "Ladies woven 100% cotton blouse", "Men's leather shoes" or "iPhone" instead of a general one.

2 Provide full international shipment data

UPS is required to provide Safety & Security declarations for air shipments from EU27 to Northern Ireland via Import Control System 2 (ICS2), therefore shippers must provide full international shipment data, including commercial invoices to meet these obligations.

What information is required from you ?

Element	All Shipments
Commercial Invoice	Required
6 Digit HS Code	Required
Commodity description of goods at item level	Required
Value and currency at item level	Required

From May 1st 2025 air imports from EU27 must comply **on arrival** to Northern Ireland. This means that UPS will request the specified requirements above **prior** to the May 1st 2025 deadline to accommodate for transit time to Northern Ireland.
